Easily accessible from the hotel, EGLSNMMI attendees can travel via an indoor walkway, making travel to and from the hospitals safe, quick and convenient. A 100 room property, the Doubletree offers all of the comforts of home.

Robert M. Wah, MD, is president of the American Medical Association, the first Asian-American with that distinction. A reproductive endocrinologist and obstetrician-gynecologist, Dr. Wah practices and teaches at the Walter Reed National Military Medical Center and the National Institutes of Health in Bethesda, Maryland.

A leader in health information technology, Dr. Wah is chief medical officer for Computer Sciences Corporation (CSC) and is regularly ranked among Modern Healthcare magazine's "50 Most Influential Physician Executives."

Previously, he served as associate chief information officer for the Military Health System and was the first Deputy National Coordinator, Chief Operating Officer setting up the ONC at HHS in pursuit of securing electronic medical records for all Americans.

An AMA House of Delegates member for 17 years, Dr. Wah has served as chair of the Board of Trustees and the AMA Council on Long Range Planning and Development. He has served on the faculties of the Harvard Medical School, the University of California, San Diego, and the Uniformed Services University of the Health Sciences.

Born and raised in Oregon, Dr. Wah has a degree in chemistry from the University of Oregon and an MD from the Oregon Health Sciences University. He is also a graduate of the Advanced Management Program at Harvard Business School. He did his residency at the National Naval Medical Center in Bethesda and had a reproductive endocrinology fellowship at Harvard in the Brigham and Women's Hospital in Boston. Dr. Wah served more than 23 years on active duty as a captain in the U.S. Navy Medical Corps.

Education and Advocacy – Nuclear/Molecular Imaging and the Future

The Eastern Great Lakes Chapter of the Society of Nuclear Medicine and Molecular Imaging, with the help of the American Medical Association, has created a compact (day and a half) multi-faceted program that combines imaging and therapy, medical policy and advocacy.

Topics include the current uses of hybrid PET/MR imaging and its potential applications, tips and techniques useful in diagnostic body CT imaging, novel nuclear approaches to functional coronary vascular and cardiac imaging and its utility for device-based therapy guidance, directed nuclear therapies for the treatment of metastatic liver disease and skeletal disease, non-dementia brain imaging, and radiation dose reduction. The latest updates about the activities of the national SNMMI will be presented by the SNMMI Immediate Past President.

We are pleased and honored to bring you the President of the AMA to talk to us about such compelling and current topics as The Affordable Care Act (PPACA), Medicare SGR repeal, Meaningful Use, PQRS, and other efforts and concerns affecting all of us in healthcare.

You are welcome to attend all or part of this meeting. We are excited about the program that we have developed with the visiting and Chapter member Speakers. The Chapter will also hold its business meeting and will be holding elections for Chapter positions. We hope to see you there—and please bring a colleague with you!

Accreditation

CME

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the Roswell Park Cancer Institute and the Eastern Great Lakes Chapter SNMMI. The Roswell Park Cancer Institute is accredited by the ACCME to provide continuing medical education for physicians.

CME credits have been applied for. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VOICE Statement

VOICE credit is pending approval from the SNMMI-TS.

Session #3 continued...

Moderator: Joshua J. Reynolds

3:30 – 4:30pm	<i>PET/CT and Bone Scans in MSK Malignancy</i> Katherine Zukotynski, BAsC, MD, FRCPC, University of Toronto, Toronto, ON, CA
4:30 – 4:45 pm	Wrap Up and Closing Comments
4:45 – 5:30 pm	Eastern Great Lakes Chapter Business Meeting and Elections

Learning Objectives

At the conclusion of this symposium, attendees should be able to:

- To become familiar with common pathologies in Abdominal Imaging
- Demonstrate understanding of the treatment algorithm used in the management of patient selection and pretreatment testing.
- Understand variations in treatment of prostate carcinoma and alternative protocols used for management of advanced stage disease.
- Discuss some of the major elements of the Affordable Care Act legislation
- Discuss changes and new directions for the AMA
- Appraise the emerging evidence for the role of radionuclide imaging for guiding device based therapy.
- Discuss the successes in Nuclear Medicine achieved by the SNMMI and SNMMI-TS
- List the radiopharmaceuticals used in NM brain imaging
- Review radiation dose trends and the concerns surrounding them
